These affordable gauges are designed to convert the air pressure on air suspension transport trucks to pounds for axle load. A 2” gauge with chrome-bezel can be easily mounted in either the cab or directly on the trailer to give an indication of load weight by using input pressures from the suspension.

E94310  (R8821) 0 - 45 x 1000 Axle Load ................................................................. $ 74.95
E94320  (R8820) 0 - 55 x 1000 Axle Load ................................................................. $ 74.95
